[Person's name] achieves board certification in advanced diabetes management through the Certification Board for Diabetes Care and Education

[City, State] – [DATE] — [Person's first and last name/credentials] has attained the Board Certified-Advanced Diabetes Management® (BC-ADM®) certification that requires passing a rigorous examination. In passing the examination, advanced clinician practitioners who earn the BC-ADM certification showcase their expertise in providing people with diabetes access to high-quality diabetes care and management.

Boilerplate - Add a quote here. Focus on how this credential will help you better serve your clients and/or your community. Anything that might be of interest to the media outlet.

“In obtaining the BC-ADM certification for advanced clinician practitioners from CBDCE, [person's first name] has demonstrated their skills and knowledge in managing complex situations and assisting with therapeutic problem-solving for people with prediabetes, diabetes, and other cardiometabolic conditions,” said Nancy D'Hondt, CBDCE's Board Chair. “Potential and current employers should recognize this credential when considering the workforce they deploy to support successful outcomes for individuals managing their diabetes.”

Health professionals who hold the BC-ADM certification, based on their scope of practice defined by their state licensure, can:

- Adjust medications.
- Treat and monitor acute and chronic complications and other comorbidities.
- Counsel people on lifestyle modifications.
- Address psychosocial issues.
- Use patient-generated health data and technology for pattern management.
- Participate in research and mentoring.

Boilerplate - If applicable, add a short paragraph about your program, practice, or health system.

About CBDCE

Established in 1986, CBDCE, formerly known as National Certification Board for Diabetes Care and Education or NCBDE, is a national not-for-profit certification organization that is responsible for overseeing certification programs for health professionals working with individuals at risk for or living with diabetes. Current programs include the BC-ADM® and the Certified Diabetes Care and Education Specialist® (CDCES®) credential.

CBDCE's mission is to promote comprehensive and ongoing quality diabetes clinical management, education, prevention and support by defining, developing, maintaining and protecting the certification and credentialing processes. CBDCE supports the concept of voluntary, periodic recertification for those who attain a certification. For more information on CBDCE, visit www.cbdce.org or contact the national office at info@cbdce.org or 847-228-9795.
