

**Summary Examination Statistics  
for the  
Certified Diabetes Care and Education Specialist  
Certification Program  
July 1, 2024 – June 30, 2025**

10/2025

The mission of the Certification Board for Diabetes Care and Education (CBDCE) is to promote quality diabetes care, education, prevention and support by providing certification and credentialing programs that incorporate and reflect best practices.

To inform the public, potential candidates, and those currently holding the Certified Diabetes Care and Education Specialist® (CDCES®) credential, CBDCE publishes a summary of the results of the certification examinations for diabetes care and education specialists (Examination) on an annual basis, using July to June data matching the examination development schedule.

**Examination Information and Statistics: July 1, 2024 – June 30, 2025**

The current Examination Content Outline (ECO) was implemented beginning with the July 2024 examinations, reflecting the results of a 2023 practice analysis that will be in effect until a new practice analysis is completed. Questions on the Examination were linked directly to a task or tasks on the pertinent ECO. Each question, therefore, was designed to test if the candidate possessed the knowledge necessary to perform the task or had the ability to apply it to a job situation.

CBDCE has offered year-round application submission and testing since 2016. Individuals apply to take the Examination year-round at a time convenient to their own schedules, and the online Examination registration is a fast and simple process. Once approved, individuals have 90 days to schedule and take the Examination. Beginning in January 2022, candidates were able to choose between taking the Examination in-person at a testing center or virtually via live remote proctoring (LRP).

For individuals working to obtain the CDCES® certification, a total of 1729 candidates took the Examination from July 1, 2024 – June 30, 2025. Of that total, 86% took the Examination for the first time and 14% had previously taken the Examination. Refer to Table 1. **Examination Statistics – July 1, 2024 – June 30, 2025 – Pass Rates by Testing Modality** for more details. A very small number of individuals were taking the Examination to reinstate credentials that had expired or renew their certification status.

Report continues on the following page.

**Table 1. Examination Statistics – July 1, 2024 – June 30, 2025 – Pass Rates by Testing Modality**

<b>Candidates Testing - First Time: July 1, 2024 - June 30, 2025</b>	<b>Number Tested</b>	<b>Pass Rate</b>
At a Test Center	1123	64%
Live Remote Proctoring	362	62%
<b>Total: First Time Candidates</b>	<b>1485</b>	<b>63%</b>

<b>Candidates Testing - Repeating Due to Unsuccessful Previous Attempt(s): July 1, 2024 - June 30, 2025</b>	<b>Number Tested</b>	<b>Pass Rate</b>
At a Test Center	197	47%
Live Remote Proctoring	47	49%
<b>Total: Repeat Testers</b>	<b>244</b>	<b>47%</b>

**CBDCE**

Founded in 1986, CBDCE is a national not-for-profit certifying body that awards the Certified Diabetes Care and Education Specialist (CDCES) and Board Certified-Advanced Diabetes Management credentials. CBDCE’s mission is to promote comprehensive and ongoing quality diabetes clinical management, education, prevention and support by defining, developing, maintaining, and protecting the certification and credentialing processes. Learn more at [www.cbdce.org](http://www.cbdce.org).

**CDCES® Credential**

The credential demonstrates to people with prediabetes and diabetes, employers, and third-party payers that the CDCES® possesses distinct and specialized knowledge, thereby promoting quality of care for people with diabetes. When the first Examination was offered in 1986, 1,248 health professionals successfully completed the certification process to become the inaugural group of CDEs. The CDE® credential transitioned to the new title of CDCES® in 2020. Accredited by the National Commission for Certifying Agencies, through the end of 2024 there were 19,241 CDCES® credentialed health professionals. (cite date April, 2025 ).The CDCES® credential has become the recognized standard for competence in diabetes care and education. As the number of individuals diagnosed with prediabetes and diabetes continues to increase, it is important for them to have access to the services of a CDCES®.
